

Aerial Work Platform

Aerial Work Platforms - There are different forklift attachments available on the market. They can help transform your forklift so that you could expand your ability to pick objects up or complete clean up jobs and material handling with greater ease.

Some attachments were particularly designed for the blades themselves. For instance, blade extensions are used when you require a lot more blade length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are another type utilized if moving rolled material to be able to ensure it does not roll off of the traditional flat forks.

Examples of lifting accessories comprise pivoting and telescoping boom or crane attachments. They can come in several different styles and are normally designed for transporting lumber, poles, metal bars and other kinds of bulky stuff. Additional accessories like for instance different kinds of hook plates and hooks are presented to pick up items making use of a sling or chain. Slab filters and magnetic filters are other stuff that can be used along with hook attachments. Slab lifters are specialized attachments that are designed for lifting different materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make transferring rolls of carpet much easier. The accessory connects onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are many different types of lift truck accessories that can be meant for facility maintenance such as snow blades. These blades connect to front end loaders and could transport materials such as soil, snow and dirt. Other common cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck blades hook onto for sweeping large spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments used on lift trucks. These spreaders are handy for various applications like spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting attachment which lots of businesses utilize daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location utilizing the lift truck. Larger platform models have extra space for employees in order to bring tools and other essential things for the job. Usually work platforms are made of poly material or steel.
